  During my internship I developed 14 scraping program which are getting the contact informations of the particular firms for marketing department and I developed 4 desktop application in Java. You can find them in my GitHub page.

- **MSKU Computer Engineering Department (Internship)**   Summer 2014
  I developed mobil aplication of GBYF Project Competition.

CERTIFICATES

- **Akademik Bilişim 2015**   GNU/Linux Course
- **Akademik Bilişim 2016**   Web Programing with Python Django
- **Bilmök 2013**
- **GDG(Google Developer Group) İzmir 2014, GDG İzmir 2015**
- **GBYF 2016**

PROJECTS

- **AndroVoip**

  In my Project I developed Softphone application based on SIP for android. Project supported by "TÜBİTAK 2209-B – Sanayi Odaklı Lisans Bitirme Tezi Destekleme Programı". You can find source code and detailed information in my GitHub page.

- **MSKU Mobil (Developping)**

  Official Android Application of Muğla Sıtkı Koçman University. You can find the applicaon in Android Play Store

- **Restaurant Otomation**
  This application is Mobil waiter otomation which is integrated with Talya Bilişim(Elektra) Company Restaurant/Hotel Cash Register progrogram. In the project I redeveloped the Elektra ELPOS program which is developed in 1990s for Windows mobil devices.

- **Calculable**

  Math Game for android. You can find source codes on my GitHub page

- **Solr Android UI**

  This is an Mobil Search engine Aplication based on Apache Lucene/Solr server. I used GBYF Project Competition data in the project. You can find source codes of project on my GitHub page.

PUBLICATIONS

- **Akademik Bilişim 2015**

  " Kurumsal Yazılım Telefonu Prototip Geliştirme Süreci "

  You can find complete paper on the Internet.

COMPUTER/SOFTWARE TOOLS

- **Development Environments**
    Eclipse, NetBeans, Android Studio, Pycharm,
- **Programming Languages**
    Python, Java
- **Frameworks/Tecnologies**
    - **Desktop UI**
      JavaFX, Window Builder
    - **WEB Programming**
      Django, Webpy
    - **Mobil Programming**
      Android
    - **Data Mining**
      Scrapy, Solr, WEKA
- **Markup Languages**
    HTML, CSS, XML
- **RDBMS Technologies**
    MySql Workbench, Oracle Database, Mssql, PHPMyadmin
- **Operating Systems**
    Windows, Linux
- **Network**
    CISCO packet tracers

MY THOUGHTS

I graduated from Computer Engineering yhis year and taking my first steps to business life. I believe that this job can't be learned in University. University just starts somethings but developing our selves are on our hands.

I proved that idea to myself in my University Life. Our University is not lecturing about mobil programing. But most of my projects are on android. And some of my mobile projects are supported by TUBİTAK or some of my projects are in usage now.

Thanks to my android works I developed myself about java. But I thing programing languages are not imported. I now programing and I can develop programs on any programing languages after spending some time on that language.

I am getting enjoy spending time on computers and programing. Therefore my job is not a source for money for me. It's like a hobby. When my hobby also I am providing my life. I thing the formula of developing and happiness is that idea.
